<b>Issue ages</b>	40-85 (Retirement Benefits Rider only)														
<b>Retirement Benefits Rider</b>	An optional rider elected at issue for an additional cost that is charged as a percentage of the accumulation value on each Contract anniversary. <b>Benefit Base</b>	Adjusted by 200% of the net change in the accumulation value on each contract anniversary, the Benefit Base is used for purposes of calculating the benefits available under the Retirement Benefits Rider. The Benefit Base cannot be withdrawn in a lump sum or as a Contract death benefit and is not the same as the Contract Accumulation Value.														
<b>Activities of Daily Living (ADL) Benefit</b>	<p>The activities of daily living (ADLs) are daily functions most adults can perform without assistance. Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for additional optional benefit riders or strategy charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.
