

Sometimes, more IS more.

Discover a powerful way to meet immediate income needs

The pandemic has led many consumers to re-evaluate their financial situation. For some, this includes reviewing and refining their approach to maximizing the value of their assets in generating lifetime income. If your advisors have clients with an immediate income need in particular, consider an innovative solution for meeting (and exceeding!) their objectives.

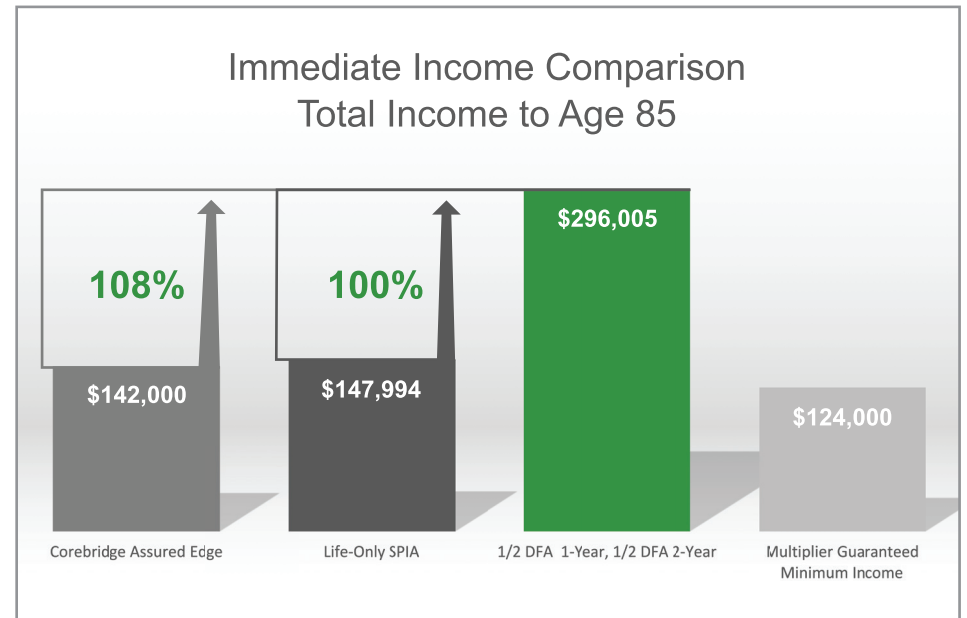

The Lifetime Income Plus Multiplier FlexSM guaranteed living benefit (GLB) rider, a feature available in the Power Select Plus Income[®] Index Annuity from AIG, may be able to help clients enjoy:

- Attractive initial payout levels for a solid baseline of guaranteed income
- Retirement raises through annual income credits¹ equal to the amount of interest credited each year, even as the account value declines!
- More cumulative income potential — to life expectancy and beyond — than many traditional SPIAs or GLWBs
- The opportunity to receive double the income should they become confined to a qualifying care facility²

Just how much more?

By examining deferral scenarios for a 65-year-old male with \$100,000 of premium, we see how the Multiplier truly stacks up to the cumulative income generating potential of leading GLWB and life-only SPIA options in the marketplace.

As you can see, Multiplier may position retirees to generate more income to life expectancy — potentially up to 108% more — than the competition!

Educate your advisors on creating better client outcomes in situations where more truly is more.

¹ Annual income credits are amounts that may be added to the Income Base and are equal to 100% of interest earned in the annuity after activating the GLB rider and lifetime withdrawals begin. Annual income credits are not added to your contract value.

² Beginning on the second contract anniversary, clients have the opportunity to receive enhanced income of up to 200% of their MAWA on or after GLB rider activation. Clients must be confined to a qualified facility such as a nursing home for at least 90 days to be eligible for this benefit.

Guarantees provided are backed by the issuing insurance company. Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be suitable or appropriate for all clients. Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if clients make withdrawals or surrender their annuity before age 59½. Clients should consult a tax advisor regarding their specific situation.

The ML Strategic Balanced Index® embeds an annual index cost in the calculations of the change in index value over the index term. This “embedded index cost” will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest, and it funds certain operational and licensing costs for the ML Strategic Balanced Index.® It is not a fee paid by the client or received by AGL.
